

YARD AND CELLAR FLOODED.

Property Owner Uptown Unable to Obtain Any Redress.

Building Inspector Charged with a False Report.

Inspector William L. Holmes, of the Building Department, seems to have gotten himself into serious trouble.

For months the owner of the house 855 West Thirty-second street has been complaining to the Department that his property was being damaged by water from defective drain-pipes—"leaders," as they are technically called—on the neighboring house, No. 857.

Inspector James Duffy, who was sent to investigate, reported that "the metallic leaders on the rear of the front house and the rear of the rear house are broken or decayed."

William S. Shaw, of 214 West One Hundred and Second street, the owner of the house complained of, was thereupon notified by the Building Department to remove the objectionable pipes. Failing to comply, suit was instituted against him for violation of a city ordinance.

During the pendency of this action, which was begun Feb. 22 last, the owner of the alleged damaged house periodically wrote letters to the Department and called personally to urge a speedy prosecution of the case, as the cellars were almost continually flooded and the rear yard rendered impassable by the overflows of water.

Holmes, who has succeeded Duffy as head of the district, was detailed to make another investigation, and on June 3 last turned in the following report:

"The said metallic leaders have been replaced with new metallic leaders and are now in good condition."

On the 10th instant this and of course further endorsement on the papers in the case that "the violation had been removed and the law complied discontinued."

Strange to say, the complaints concerning the damage done to No. 857, which originated from Shaw's house, continued to come in to the Building Department, notwithstanding Holmes's statement that the offending pipes had been removed and the law complied discontinued.

A reporter who was sent out to investigate yesterday found no trace of the leaders in the rear of the front house, but that the leader on "the rear of the rear house" was "damaged and rotten to the core."

Supt. Brady of the Building Department, however, said that it was found that Holmes had intentionally made a false report the day before he would investigate, and that he was

"It was for the very same kind of offense," he said, "that Duffy was dismissed."

FORTY DENVER WOMEN.

Making a Show of Themselves by Wearing the Divided Skirt.

Denver has a band of enthusiastic women who wear the divided skirt. They are in such a hurry to vote that they can't wait until the law gives them the right to the breeches. They do not carry canes or smoke, as yet.

STYLE IN DENVER.

There are about forty women in the movement, and they will be pictured in the "Sunday World" to-morrow. Even women who don't want to wear the trousers will find the story interesting.

Coming Events.

Second annual excursion of the Galway Men's Association to Riverton Grove, on the Hudson River, June 23.—Prominent lawyers engaged in business in Denver before Justice Parker yesterday. Ralph Talbot endeavored to obtain some papers from the hands of Henry D. Reilly, and struck him between the eyes, shooting him and drawing blood. Mr. Reilly regained his feet and was about to return the blow when the two were separated. It is quite an old man, and his assailant is much younger. The court gave Talbot a scorching reprimand and fined him \$5.
